M710

HF SS MARINE TRANSCEIVER

Your new Icom M710 has 160 user programmable marine channels, in addition to the ITU channels, most of which have been preprogrammed by Icom America Inc. These channels have been programmed to best reflect the needs of boaters throughout the United States. These “USER” channels can be reprogrammed by you, the user. A list of the preprogrammed channels is attached. Also attached is the procedure you can use to reprogram these channels to best reflect your operating needs.

■ Programming a frequency

The IC-M710 has up to 160 user-programmable channels each with channel name capability of up to 7 alphanumeric characters.

NOTE: ITU simplex channels can be programmed as well as user channels. However, transmit frequencies cannot be programmed (not necessary to program).

◇ Receive frequency

- ① Select the desired user channel to be programmed.
 - Channels 1 to 160 (maximum) are programmable.
- ② Push [CE] to select frequency selection mode.
 - "▶" and frequency appear on the display.
- ③ Enter the desired frequency via the keypad with 5 or 6 digits.
 - Or rotate the [CHANNEL] selector to change the frequency.
- ④ To change the operating mode (type of emission), push [MODE] one or more times.
- ⑤ Push and hold [RX] for 1 sec. to program the user channel.

Push [CE]

Frequency and "▶" appear.

Set frequency.

Use keypad or channel selector.

Push and hold [RX].

Programming is completed.

◇ Transmit frequency (Not applicable for General versions)

- ① Select the desired user channel to be programmed.
- ② Push [TX].
 - "TX" blinks.
- ③ Push [CE] to select frequency selection mode.
 - "▶" and frequency appears on the display.
- ④ Enter the desired frequency via the keypad with 5 or 6 digits.
 - The [CHANNEL] selector cannot be used.
 - Refer to p. 23 for programmable frequency range (frequency coverage, transmit).
- ⑤ Push and hold [TX] for 1 sec. to program.
- ⑥ Push [TX] to clear the "TX" blinking.

Push [TX].

"TX" blinks.

Push [CE]

Push and hold [TX] after entering a frequency.

◇ Channel name

- ① Select the desired user channel to be programmed.
- ② Push [CH/FREQ] to select channel indication.
- ③ Push [FUNC] then [CE].
 - The channel name (alphanumeric) readout blinks.
- ④ Rotate the [GROUP] selector for cursor position and the [CHANNEL] selector for the message contents.
 - To return to the previous message, push [CE].
- ⑤ Push and hold [RX] to program the message.
 - Blinking stops.

Push [FUNC] then [CE]

Rotate [GROUP] and [CHANNEL] to select cursor and character.

Push [RX].

• Available characters: 0 to 9 A to Z _ (space) ' ' * + - / \ = > < & #

Channel name programming is inhibited on some versions.

M710 User Channels
